

What did the Pilgrims find on Cape Cod?

The Pilgrims made three exploring trips on Cape Cod to look for a place to live.

On one of the trips, they found a basket of Indian corn. The Pilgrims needed corn to plant so that they would not go hungry the next year. But they knew the corn belonged to the Indians. It was not theirs to take.

At last they decided to take as much of the corn as they could carry. They said they would pay back the Indians later.
